Description of the navigation program

Navigation Aponia TRUCK GPS Navigation is specially designed for truck drivers. It provides a safe and reliable route calculation on the roads suitable for trucks.

Truck drivers know that the selection of the wrong route not only leads to a waste of fuel but also the amount of mileage to bypass routes, time loss and in some cases to security problems.
Unlike conventional navigation systems for cars Aponia TRUCK GPS calculates the best route based on vehicle parameters, selected parameters of the route, type of load and is able to account for dangerous materials.

The driver can adjust the vehicle profile, which is taken into account when calculating the route. You can set the length, width, height, weight, maximum axle load and whether the vehicle transporting dangerous materials.

Route calculation

Accurate and fast route calculation / recalculation
Route planning according to criteria that can be activated or deactivated (highways, toll roads), and so must avoid toll roads.
Planning a "fast" or "short" route
Possibility of blocking certain parts of the route, detours, etc.
Planning a route based on live traffic
Planner and Itinerary - Start, Target, Via points, around a waypoint (news - allows hug cities around the circuit)
Distance to destination with the remaining time until arrival
map view

Clear display maps

The color map of the design and content comparable to paper map
Several map styles
User friendly interface adapted for finger control
2D (top view) and 3D view with 3D buildings
The size of the zoom (camera height) are changed by the current speed
Color scheme for day and night mode
Ability to display external data and the radar
navigating

Voice guidance in several languages, including Czech
Mode driver, pedestrian and helicopter (as the crow flies - for tourism, etc.)
Understandable navigation elements
Signals - information signs
Detailed navigation lane
Notifications speeding adjustable tolerance
Information about safety warning on them, including the measured speed at a given location or sector
Search options

Search by country, city / building number, street, house number / junction
Favorites, Home, Work, search by GPS coordinates, history
Clever Keyboard help
Support for custom POI "Points of Interest" - radars etc. with a warning.
Search POI "Points of Interest" (including user-defined POI), by position or route

Albania, Andorra, Belarus, Belgium, Bosnia and Herzegovina, Bulgaria, Montenegro, Czech Republic, Denmark, Estonia, Faroe Islands, Finland, France, Gibraltar, Guernsey, Croatia, Ireland, Iceland, Italy / Vatican City, Jersey, Liechtenstein, Lithuania Latvia, Luxembourg, Macedon, Hungary, Malta, Moldova, Monaco, Germany, Netherlands, Norway, Isle of Man, Poland, Portugal, Romania, San Marino, Slovakia, Slovenia, Serbia, Spain, Sweden, Switzerland, Ukraine and the United Kingdom.

Package contents

- Auto-Charger 12-24V
- Micro USB 2.0 data cable for PC connection
- Holder with suction cup on the window
- CZ Manual load it, or if the ADR.
